Junior Software Engineer with experience in web, mobile, and backend development. Proficient in technologies such as React, Laravel, and SwiftUI, with hands-on experience in IoT, analytics, and agile methodologies like SCRUM. Eager to continuously learn and contribute to impactful digital products.

EDUCATION

Computer Technologies Engineering at Tec de Monterrey - 2023 - present

CERTIFICATIONS

IT Specialist - Python - 29 Jun 2024 - Certiport
Machine Learning Specialist - 29 Jun 2024 - Certiport
JF Java Fundamentals Learner - 10 Nov 2024 - Oracle Academy
JP Java Programming Learner - 10 Nov 2024 - Oracle Academy
Agile Software Development - March 10, 2025 - University of Minnesota
Visual Elements of User Interface Design - March 10, 2025 - California Institute of the Arts
CCNA: Introduction to Networks - June 13, 2025 - Cisco Networking Academy

TECHNICAL SKILLS

- ·**Languages**: JavaScript, Python, C++, Java, SQL
- ·**Frontend**: React.js, React Native, Expo, HTML/CSS, Tailwind
- ·**Backend**: Node.js, Laravel, Flask, Django
- ·**Mobile**: SwiftUI, Flutter Flow
- ·**Databases**: MySQL, MongoDB, SQLite
- ·**DevOps**: Docker, Git, GitHub
- ·**Tools**: Figma, Postman, ApolloGraphQL, Playwright
- ·**Methodologies**: SCRUM, Agile

EXPERIENCE

Backend Developer & Temporary Scrum Master - Grupo Automotriz Cesvi

Developed backend (Laravel) and integrated React dashboards with real-time filters (1000+ records). Temporarily led agile development as Scrum Master. The platform enabled performance comparison across 7+ insurers and their workshop networks to optimize repair decisions by accident type.

Junior Fullstack Developer - Cretia

Resolved issues, developed features, and performed application maintenance. Contributed to code refactoring, user experience improvements, and performance optimization. Technologies used: Expo, React Native, Apollo GraphQL, Playwright, LLMs, TypeScript.

Junior Developer - INGENIUS

Built the web platform for INGENIUS Congress and Expoingenierías, enhancing registration and access to events. Supported a large-scale academic innovation event.

Lead Developer - Remote Lab (Novus)

Designed and implemented a remote programming and electronics platform enabling real-time equipment control and practical experimentation.

Project Leader - CYBERDECK

Led development of a rugged laptop for emergency services with voice and emotion recognition. Achieved third place at Expo Ingeniería 2024.

SOFT SKILLS

- **Problem Solving**
- **Team Work**
- **Adaptability**
- **Leadership**
- **Communication**
- **Innovation**
